

**Renewable Energy Procurement and Enforcement Plans  
Proposed for Consideration on December 6, 2011.**

On April 12, 2011, Governor Brown signed into law Senate Bill (SB) 1X2, establishing a new Renewable Portfolio Standard (RPS) of 33% by 2020 for all load serving entities in California. Silicon Valley Power (SVP), as a public utility, is covered under the new law.

SB 1X2 establishes minimum quantities of renewables that load serving entities must procure through 2020 ranging from 20% of retail sales by 2013 to 33% by 2020. Each load serving entity covered under the new law, including SVP, is required to develop and implement a Renewable Energy Procurement Plan.

SVP's Renewable Energy Procurement Plan and RPS Enforcement Plan will be considered for adoption at the December 6, 2011 City of Santa Clara City Council meeting at 7:00 p.m., City Hall Council Chambers, 1500 Warburton Avenue, Santa Clara.
